How Long Does Vienna Sausage Last Unopened?

Because Vienna sausages are canned, they last a long time as long as they're unopened. Like many other canned foods, they will last over a year without losing any flavor or nutrition. In fact, they can last up to five years without deteriorating in quality. That's some seriously long-lasting meat!

There's an easy way to help your unopened sausages last even longer. All you need to do is store them in a cool, dark area in your home (italianbarrel).
