Do Mosquito coils work?

Mosquito coils are a repellent, which works by discouraging mosquitoes from hanging around but does not kill them or their larvae. Repellents are only deterrents and do not guarantee that your space will be fully protected.

When used correctly, mosquito coils are okay at discouraging mosquitoes and other biting insects (mosquitonix).

Mosquito coil is a price controlled good and retails as follows:

Item	Quantity	Price
Flamingo Mosquito Coils	12 pieces	\$1.50
Protox Citronella Mosquito Coils	6 pieces	\$1.73
P I C Citronella Mosquito Coils	10 pieces	\$5.27
Bug Mat Vape	30 pieces	\$6.40
