WHEN TO USE POWDER DETERGENT

You can safely use powder detergent anytime you do laundry and want to save money. It is more effective than liquid detergents at removing grass, mud, and ground-in dirt. This makes it perfect for washing children's play clothes, sports uniforms, and clothes worn for farming and manual labour. Use as a Presoak: 1. To help remove heavy soil and stains, before the clothes are added to the washer; 2. For cotton clothes (socks), fill a bucket or tub with hot water and add the powder detergent. Stir to dissolve and add the clothes; 3. For synthetic fabrics, dissolve the powder in some hot water and then add it to a bucket of or tub of cool water before adding the clothes to soak (thespruce).

Item	Size	Price
Radiante Powdered Detergent	1750g	\$11.93
