Can I use dish liquid to clean clothes?

There are lots of things that dish liquid is great for washing. But for cleaning clothes? Please, step away from your washer and take the squeegee bottle with you. According to the experts, 'Dish liquid was not formulated to clean clothes like laundry detergent is, so while it may remove some dirt and grease stains, it will not clean your clothes as effectively.' Also, 'it will leave soap residue on fabrics that is hard to get out and this residue can cause discoloration or damage to the fabric.' (homesandgardens).

Dish liquid is a price controlled good, and retails as follows:
